TRAINING TITLE Moving Equipment on the Jobsite		
<p style="text-align: center;">KEY TEACHING POINTS</p> <ul style="list-style-type: none"> • The best way to avoid danger from self-propelled units, such as cranes, dozers, and trucks, is to keep your eyes open and stay out of the way. The operator does his best to keep from running over anyone. But with all the commotion on the jobsite, he might not see you. And don't depend on hearing a horn or an alarm. A construction site, as you know, is not only busy, it's noisy. • Be especially careful when a vehicle is backing up. The operator should ask his foreman to direct him into the space. But sometimes he doesn't. So, since he can't see you, you have to watch out for him. Never take a chance and dart behind a vehicle that's backing up. If you slip and fall, you've had it. • Don't ride on any vehicles except those intended to transport you on. This goes for the running board or drawbar of a unit, loaded trucks, or the bucket of a bucket loader. Riding on the top of a load is especially dangerous. You may fall off if the load shifts or be crushed when going under low clearances. When riding in transport vehicles, keep you arms and legs inside where they belong. • Don't walk alongside moving equipment. You can be killed or injured if the vehicle slides or turns, or if the load shifts. Don't walk under loads on cranes or hoists. Be especially careful not to touch the frame of a crane when there are power lines in the area. If the crane touches one of them, you'll be electrocuted. Remember, too, that electricity can jump several feet, depending on voltage and weather conditions. So, in addition to not touching the crane, stay well clear. • Not only vehicles, but moving equipment of any kind is dangerous. If, for example, you're working on portable staging, scaffolding, or work platforms, stay off while it's being moved unless it is designed for you to be on it. • Stay ahead by not getting behind (or alongside of) moving equipment. The more you're alert, the less chance you'll have of getting hurt. 		
TEST		
QUESTION	ANSWERS	
	TRUE	FALSE
1 The best way to avoid danger from self-propelled units, such as cranes, dozers, and trucks, is to keep your eyes open and stay out of the way.		
2 Be especially careful when a vehicle is backing up.		
3 Don't ride on any vehicles except those intended to transport you on.		
4 Don't walk alongside moving equipment.		
5 Stay ahead by not getting behind (or alongside of) moving equipment.
